

## Lubricant grease WP-2

### Product data

Grease WP-2 is a refined base oil with special thickener, made of additives such as anti-rust, it is a multi-effect long-life lubrication developed for various applications under extreme temperature conditions fat.

#### **Main performance and advantages:**

1. Good adhesion.
2. Good water resistance.
3. It has excellent anti-rust performance and effectively prevents the corrosion of mechanical parts.
5. Good low temperature performance, with high and low temperature resistance. Turns dry lubricant oil film when temperature over 300°C.

#### **Recommended Applications:**

1. Lubrication of heavy-duty mechanical friction parts such as bearings, gearings, chains, metallurgy, mining and other industries.
2. Recommended working temperature: - 25°C ~ 180°C.

## CHARACTERISTICS

<b>Color</b>	<b>Visual inspection</b>	<b>White transparent</b>
NLGI	ASTM D217	2
Color	/	Blue
Penetration at 25°C, (0,1mm)	ASTM D217	265-295
Copper corrosion test (100 °C , 24hr)	ASTM D4048	Passed
Drop point (°C)	ASTM D2265	Min 270
Extreme pressure performance (four-ball machine method), N, PB	ASTM D2596	618
